WebEx Q&A Feature

Have a question?

Send your questions through the **Q&A panel** located to the right of your screen.

You may need to activate the Q&A by clicking on the Q&A icon (lower right portion of your screen).

Or click on 3 dots

The screenshot shows a WebEx interface with a 'Have a question?' section. It contains text explaining how to use the Q&A panel and how to activate it. At the bottom, there is a navigation bar with icons for 'Participants', 'QA', and a three-dot menu. The 'QA' icon is circled in red.

The American Community Survey

2017-2021 ACS 5-Year Release Schedule

MEDIA EMBARGO: Tuesday, December 6, 2022

- Embargo at 10 a.m. (EST), includes 2017-2021 ACS 5-year estimates:
 - 5-year data products

Press Kit: census.gov/newsroom/press-kits/2022/acs-5-year.html

PUBLIC RELEASE: Thursday, December 8, 2022

- Data released at 10 a.m. (EST), includes 2017-2021 ACS 5-year estimates:
 - All 5-year data products
 - Narrative Profiles
 - ACS Data Tools: data.census.gov, API, QuickFacts, My Tribal Area

The American Community Survey

The Foundation

The American Community Survey is on the leading edge of survey design, continuous improvement, and data quality

- The nation's most current, reliable, and accessible data source for local statistics on critical planning topics such as age, children, veterans, commuting, education, income, and employment
- Surveys **3.5 million** addresses and informs over **\$675 billion** of federal government spending each year
- Covers **40+ topics**, and supports over **300** evidence-based federal government uses
- Three key annual data releases:
 - 1-year Estimates (for large populations, geographies of 65,000+ population)
 - 1-year Supplemental Estimates (for small populations, geographies of 20,000+ population)
 - 5-year Estimates (for very small populations, geographies down to Census Tracts and Block Groups)

The American Community Survey

5-Year Geography

- Over 620,000 geographic areas
- All geographic areas including Census Tracts & Block Groups

- 87 different geography summary levels available

The American Community Survey

5-Year Estimates

- Data spans 60 months, weighted to produce estimates, and controlled for age, sex, race, and Hispanic origin
 - 5-year estimates are NOT an average of 1-year estimates
- Estimates are based on geographic boundaries of the last year in the 5-year period (e.g., 2021)
- Dollar-value estimates are inflation adjusted to the most recent year for the period

The American Community Survey

When to Use 5-Year Estimates

When to Use 5-Year Estimates:

- No 1-year estimate is available
- Margins of error for 1-year estimates are larger than desired
- Analyzing data for small population groups
- Comparing various geographies when one or more of them do not receive 1-year estimates

census.gov/programs-surveys/acs/guidance/estimates.html

The American Community Survey

Comparing 5-Year Estimates

Comparing 5-Year Estimates:

- Only compare non-overlapping periods (e.g., 2017-2021 and 2012-2016)
- Only compare 5-year estimates to 5-year, not to 1-year
- Comparing across geographies and/or subpopulations
- Recommended to compare percentages, means, medians and rates instead of count totals (if possible)

census.gov/programs-surveys/acs/guidance/comparing-acs-data/2021.html

- How to Access ACS Data
- ACS Website & Resources Demo
- Q&A

The American Community Survey

Population Controls for the ACS

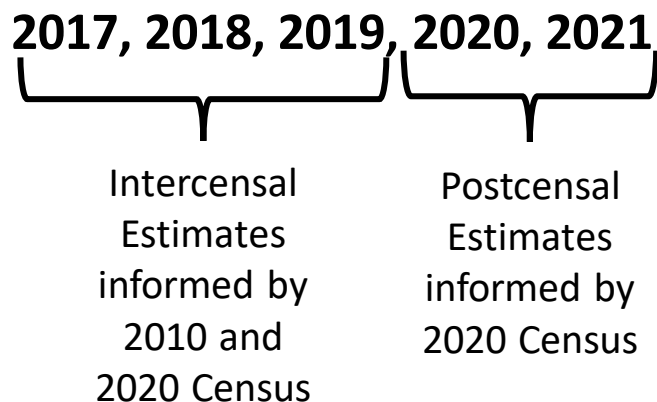

- ACS data are controlled so that the number of housing units and people in certain categories are consistent with the Census Bureau's official estimates from the Population Estimates Program.
- The population controls for the ACS 5-year product are the average of the population estimates across the 5-year period.
- In most years, the ACS simply uses the latest release of postcensal estimates, which are produced for the most recent census forward, for each of the five years.
- If the period straddles a decennial year then the intercensal estimates are used for years prior to the decennial and the postcensal estimates are used for the decennial year forward.

The American Community Survey

Population Controls for the 2017-2021 ACS 5-Year

- Due to delays in the 2020 Census processing, the 2010 to 2020 Intercensal Estimates were not available for the 2017-2021 ACS 5-year.
- Our solution was to bridge the 2017-2019 population estimates to form a consistent time series with 2020 and 2021.
- This process made the population estimates used as controls for the 2017-2021 ACS 5-year generally consistent with the 2020 Census.

The American Community Survey Summary File

- Two formats available for 2021 release:
 - **Table-Based** (new format; recommended)
 - **Sequence-Based** (original format)
- Table-Based only format for 2022-beyond releases.
- Table-Based groups estimates and MOE by Table ID
 - File for each table containing data for all geographies
- Complexity of the Summary File reduced with Table-Based format
- Download of large number of Detailed Tables

ACS Summary File

[Share](#)
[Facebook](#) [Twitter](#) [LinkedIn](#)

The American Community Survey (ACS) Summary File is a unique data product that includes all estimates and margins of error (MOE) from the [Detailed Tables](#) for all geographies published for the ACS. The ACS Summary File allows data users to download statistics for a large number of tables and geographic areas. Currently, there are two methods for downloading the summary file: the new Table-Based Format and original Sequence-Based Format.

Table-Based Format

For the 2018 data release, the Census Bureau tested a new, Table-Based Format for the ACS Summary File. This format groups the estimates and MOE by table ID, removing the need to merge these files. That is, a file is posted for each table containing both the estimates and MOE for all available geographies. Data users only need to merge in geography labels to create complete tables.

The Table-Based Format is the recommended format for the 2021 data release, and it will be the only format starting with the 2022 data release. Check out the Getting Started and data year tabs below for information and resources. The resources include instructions for merging the geography labels with each table via Excel or programs like SAS and Python.

To share feedback on the Table-Based Format, please send your comments to acso.users.support@census.gov and title your message "ACS Summary File Feedback". We appreciate hearing about what you like or what we can improve.

Changes for the 2021 Data Release

The 2021 data release is the final release of the original Sequence-Based Format; it is available for years 2005 through 2021. More information, including data, instructions and example programs are located on the [ACS Summary File Sequence-Based Format](#) page. Starting with the 2022 data release, the Table-Based Format will be the only format available.
